# Business Value Gap Calculator

## Product Overview

**The Bstar Business Value Gap (BVG) Calculator determines the difference between what your business is worth today and what it needs to be at time of sale.**

The Business Value Gap Calculator is an online application and has received patent approval within Australia. Australian Patent Number: 2007203047.

Ask these 5 questions to determine your need for a value gap calculation:

1. What is the current business value?
2. What is the business value needed at sale?
3. What is the period before you can afford to sell?
4. What is your profit target?
5. What are your growth strategies?

If you don't know the answer to any one of these questions, then you would benefit from completing a Business Value Gap Analysis.

Key components of the Business Value Gap Calculator include:

- Business Profile
- Current Position (assets and liabilities)
- Assets needed at time of sale
- Business Capitalisation Rate
- EBIT (past 3 years) and growth rate

Outcomes:

By using the online BVG Calculator you can achieve peace of mind from knowing what your profit target needs to be to attain your desired sale price.

Use this online calculator to complete your Business Value Gap analysis and receive a personalised Business Value Gap Statement outlining future business value, value gap, period before sale and profit target.
